Product Name :
Equilibrium Single Plane Statically Determinate System

Product Code :
LBNY-0005-101000136

Description :

Investigation of the static principle of freeing.
Two reactions (1x pin joined, 1x free).
Three deflection rollers.
Full compensation for the reactions by cable forces.
Movable clamped weight.
Steel rule with millimetre scale.
Experimental set-up in frame.
Storage system to house the components.

Technical Specification :

Equilibrium Single Plane Statically Determinate System
