Product Name :
Falling Film Absorption

Product Code :
LBNY-0005-12700029

Description :

Measurement of oxygen concentration, temperature and flow rate
2 hand-held measuring units for measuring the oxygen concentration upstream and downstream of the absorption column
Falling film column for the absorption of oxygen from the ambient air in a solvent (water)
Counter flow process
Continuous regeneration of the solvent with nitrogen in a desorption column by stripping
Pump for recirculating the solvent to the absorption column
1 compressor for supplying ambient air into the falling film column
Pump for desorption column.

Technical Specification :

Falling Film Absorption
