**Product Name :**  
Reactions Of Beams Apparatus

**Product Code :**  
LBNY-0005-13300016

**Description :**

**Range of Experiments:**

Measurement of loads and moments on a lever.

Comparison with calculated results and validation of the principle of equilibrium

Experimental determination of the reaction forces in the supports of a simply supported beam under various loadings.

**Features:**

Practical verification of equilibrium of vertical force or moments.

Simply supported beams or levers can be set up.

Low cost, effective teaching

Self-contained.

Bench mounted.

Loads and supports can be placed in any position.

Direct measurement of reactions by spring balances.

**Technical Specification :**

Reactions Of Beams Apparatus
